However, failure to attend the pre-bid conference shall not relieve the bidder of responsibility for information discussed at the conference. Furthermore, failure to attend the pre-bid conference and inspection does not relieve the successful bidder from the necessity of furnishing materials or performing any work that may be required to complete the work in accordance with the specification with no additional cost to the owner.

Submittals:

Bidders shall fill out the table on page 5 of this document and submit it with bid submission in order to complete the bid. Failure to submit this completed table with bid submission will deem bid non-responsive and rejected.

Specifications:

Jefferson Parish is seeking bids from potential vendors to provide as-needed collection of used/waste motor fluids such as gasoline, antifreeze, motor oil (including: transmission fluid, brake fluid, lubricating oils, compressor fluids, and other motor oils), contaminated/mixed waste fluids, and used oil filters from Jefferson Parish facilities.

Service Locations:

Jefferson Parish currently has 32 locations, managed by 4 different governmental departments, which produce and store waste motor oil in tanks and in 55 gallon drums. Most of these locations will need to be serviced one to three times per year (see waste oil station spreadsheet for details). Four of these locations will need to be serviced several times a year, in some cases, once or several times per month. These four locations (described below) produce gasoline, antifreeze, and waste oil filters as well as waste oil.

- **Parish Waste Fluids Drop Sites:** The Parish operates two (2) waste motor fluid collection centers for use by Parish residents. Residents are allowed to dispose of small quantities of waste fluids from autos, lawn mowers, boats, etc., daily at these drop sites. The facilities are located at 400 David Drive, Metairie, LA., and 6440 Lapalco Blvd., Marrero, LA. Each site has separate, permanent containers for used motor oils and used antifreeze. The vendor must service these containers with a vacuum pump. Additionally, each drop site uses 55

gallon drums to containerize gasoline (4 drums) and used oil filters (1 drum). These drums may be emptied at the site and left in place, or they may be removed completely and replaced with empty drums. Finally, although the containers at these sites are clearly labeled and site attendants work to monitor citizens depositing fluids, there have been cases when containers became contaminated with other fluids (e.g. water, diesel, paint, or other household chemicals).

- **Fleet Management:** The Parish has two facilities where maintenance of all local governmental vehicles is performed. These sites are located at 4901 Jefferson Highway, Suite A, Jefferson, LA. and 1501 River Park Road, Bridge City, LA. Both sites produce several thousand gallons of waste oil per year that must be vacuum pumped for removal. The Jefferson Highway location uses 55 gallon drums to house waste gasoline and antifreeze for both sites. Despite efforts to maintain drums with only used gasoline, some drums at this location hold gasoline that becomes mixed with water or other contaminants such as diesel fuel.

All other locations only produce waste oil.

Additional Parish-owned locations to be serviced may be identified during the contract term.

Requested Services:

Vendor shall provide labor, equipment, transportation, and all else incidental to remove waste fluids from specified locations safely and in compliance with federal, state, and local regulations.

- o The Parish will not provide equipment for loading fluids into vendor vehicles.
- o The Parish will not be responsible for marking or labeling materials for transport.

Services must be provided at each location on an as-needed basis within seventy-two (72) hours of request by the Parish (including weekend hours).

All fluids shall be sold, disposed of, processed, and/or recycled in accordance with federal, state, and local regulations.

Non-Conforming Materials:

Vendor will be responsible for removing contracted fluids in the event that the fluids become contaminated.

The Parish will be responsible for the extra costs incurred by transportation and disposal of any waste fluids that are contaminated with incompatible materials upon proof of said contamination.

Vendor must notify the appropriate Parish department in writing if fluid contamination has been detected and has incurred extra charges. Notification must specify the type of contaminant if it can be identified.

Any unsuitable product must be disposed of in accordance with federal, state, and local regulations.

Testing and Measurements:

Vendor must provide its own equipment to measure the quantity and test for the quality of the fluids it removes from Parish service locations.

Vendor measurements and test results will govern the transactions employed for this contract.

Proof of vendor's proper calibration and equipment inspection must be provided to the Parish upon request.

Emergency Services:

In the event of an emergency such as severe storm or hurricane, all drums of gasoline and oil filters must be picked up from the Parish Waste Fluids Drop Sites (400 David Dr., Metairie, LA. and 6440 Lapalco Blvd., Marrero, LA.) within 48 hours of notification.

Replacement drums must not be left at the site when full drums are picked up for an emergency. Replacement drums must be dropped off within 48 hours after notification by the Department of Environmental Affairs that the emergency has passed.

Bid Requirements:

Inclusive Pricing: Provide bid prices for each material to be serviced on the attached bid form. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of each fluid/material. Read the following specifications as a guide to filling out the bid form.

- ▶ **Price per Gallon of Waste Oil:** Provide a current price per gallon for removal of waste oil based on the most recent month's value for a barrel of crude oil (use the U.S. Energy Information Administration's WTI index found here:
<https://www.eia.gov/dnav/pet/hist/LeafHandler.ashx?n=pet&s=rwtc&f=M>)
Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of used motor oil. The Parish understands that the cost of collecting waste oil will vary. Provisions for changes to the bid price for waste oil will be made in the following section.
- ▶ **Price for Waste Gasoline and Used Oil Filters:** Provide prices for removing waste gasoline and used oil filters by the drum. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of waste gasoline and used oil filters.
- ▶ **Replacement Drums:** If the vendor intends to remove the drums of gasoline and used oil filters from Parish sites rather than empty and leave them in place, the vendor must fill out the second line item for each material on the bid form specifying the price of the vendor's provision of a

replacement drum. If vendor does not plan to remove drums, leave these line items blank.

- ▶ **Price for Waste Antifreeze:** Provide a price per gallon for removing waste antifreeze. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of used antifreeze.
- ▶ **Common Contaminated Fluids:** Provide a price per gallon for servicing each of the contaminated fluids listed below. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose of each fluid.
 - Motor oil contaminated with gasoline.
 - Gasoline contaminated with water.
 - Antifreeze contaminated with motor oil.
 - Antifreeze contaminated with gasoline.
- ▶ **Emergency Service Trip Fee:** To avoid inflating the cost of regular service, the Parish requests an independent quote for the price of emergency gasoline and oil filter pick up from the Waste Fluids Drop Sites. Prices must include all costs and fees (equipment, fuel, labor, testing, permitting, administration, etc.) required to pick up, transport, and process/recycle/dispose both waste gasoline and used oil filters in emergency conditions and within the 48 hour time frame required. This quote must be given as cost per trip and include picking up both materials in the same price. This quote should not include the price of the replacement drums but must include all costs for the extra trip transporting the replacement drums to the Drop Sites after the emergency has passed.
- ▶ **Waste Oil Royalties:** The Parish is to receive royalties for waste oil when the value of the commodity reaches a specific threshold. This threshold and the formulas that will govern fluctuations in the price of oil removal services are discussed in the following section.

Accounting for Variance in Waste Oil Pricing: Due to fluctuating market conditions based on the price of crude oil, the Parish expects the cost of removing waste oil to change during the course of the contract. The Parish currently anticipates paying for waste oil removal services because the price per barrel of crude oil is so low. As the price of crude oil rises and the value of recycled oil increases again, the Parish will expect to earn royalty payments for the waste oil collected from Parish service locations. The table in this section is organized to generate an accountable system that will govern changes in waste oil prices and royalties. Use the following specifications as a guide to filling out the table below.

- ▶ **Waste Oil Pricing Formula:** The vendor must generate a formula for prescribed use in determining the cost of waste oil removal services. We advise that the formula be based on the above referenced EIA's West Texas Intermediate (WTI) index. Using the formula, the Parish must be able to review changes in the price charged for waste oil removal services.

- ▶ **Price per Barrel Threshold:** Because used oil can also be a profitable commodity, the Parish requires that royalties be paid for material if and when the price per barrel of crude oil reaches a specified amount. The vendor must identify a threshold for the price of a barrel of crude oil over which it will agree to pay Jefferson Parish a royalty fee per net gallon of used oil (for all used oil which contains 5% or less water).
- ▶ **Waste Oil Royalties Amount/Formula:** The vendor must specify an amount, or a formula to determine an amount, that it will agree to pay per gallon of oil in royalties if the price per barrel of oil reaches the agreed upon threshold. The vendor must also specify an amount for a transportation fee should the price per barrel of oil

Vendor shall provide, upon departmental request, before award, copies of any and all required federal, state, and local permits for the transport of specified waste fluids.

All drivers shall be properly licensed to haul these wastes and licenses must be made available upon request.

Vendor shall provide, upon departmental request, before award, copies of any and all applicable LA Department of Environmental Quality permits, including the Used Oil Storage and Transfer Permit, for processing, recycling and disposal sites to be used as transport destinations.

Vendor shall provide, upon departmental request, before award, samples of manifests (one if universal, several if different for each fluid) to be used in governing service provision.

Contract Terms:**Invoicing and Payment:**

Invoices must be submitted to Parish departments on a monthly basis.

Each Parish department will pay separately for services rendered to their facilities. Billing information is listed on the second sheet of the attached waste fluid spreadsheet.

Invoices with relevant manifests attached must be provided to each Parish department for payment for services rendered to their facilities.

Invoices must reference manifest numbers and accurately reflect the information on the manifests in order for payment to be processed.

Payment will only be processed after services are rendered and proper invoices and manifests have been received by the appropriate department.

Waste oil charges must be calculated each pay period using the formula stated in the vendor's bid. The formula must utilize the most recent monthly average for the price of crude oil found on the US Energy Information Administration website:

<https://www.eia.gov/dnav/pet/hist/LeafHandler.ashx?n=p&s=rwtc&f=M>

All royalty payments from the vendor to the Parish garnered by any service location (regardless of the supervising department), shall be submitted to the Jefferson Parish Department of Environmental Affairs. Related oil manifests must be sent to the Department of Environmental Affairs with the royalty check.

Manifests:

The vendor shall supply the Parish with two copies of a completed manifest or certificate of receipt for each fluid removed from a Parish site. One copy of the manifest will be left with a Parish employee or approved agent at the pick-up location and one copy of the manifest will be sent with the invoice to the associated Parish Department billing address or with the royalty check to the Department of Environmental Affairs.

A unique manifest will be filled out for each fluid removed from each Parish service location (even if more than one fluid is picked up in a trip).

The manifests must certify the type of material collected, date material is collected, and quantity collected, the site collected from, and the destination of the materials collected.

All manifests must be signed by a Parish employee or authorized agent certifying that service was provided. Failure to do so will result in delay of payment or non-payment for services.

All manifests must be signed by an employee or authorized agent of the vendor certifying receipt of materials. Failure to do so will result in delay of payment or non-payment for services.

Reporting:

The vendor shall, each month, provide the Parish's Department of Environmental Affairs with a written report, within 15 days after the end of each month, showing for each site collected from, the amounts of each fluid collected, dates collected, and the charge invoiced to the correlating department. The monthly report shall also identify the end-use of each material.

In the case that royalties are paid, payment totals and the related oil quantities shall also be included with the monthly report.

In addition to the above, total amounts collected shall be reported monthly as follows:

- ▶ Gallons per month of used motor oils and end destination (processing or disposal).
- ▶ Gallons per month of used antifreeze and end destination (processing or disposal).
- ▶ Gallons per month of used gasoline and end destination (processing or disposal).
- ▶ Gallons per month of contaminated fluids and end destination (processing or disposal).
Include type of containment.
- ▶ Total# or weight of used oil filters collected per month.

Liability/Indemnification:

The vendor is responsible for the cleanup of any spills that occur during loading, unloading, or transport of materials in their vehicles.

The Parish cannot guarantee any minimum quantity of product or need for services.

Quantities of product will vary.

Service locations will vary.

Jefferson Parish has the right to cancel a contract for any reason providing a 30 day cancellation notice.
